L : Lecture, T : Tutorial,SLr : Supervised Learning, P: Project, R : Research, C : Credits, T/L/ETL :Theory / Lab / Embedded Theory and Lab

OBJECTIVES

Interpretation as a branch of legal science emerges out of the necessity triggered by the element of fallibility of human communications. It is part of laws of nature. The increase in the creation of human legislations further validates the role of interpretation as a consistent source of legislation. The primary aim of all interpretation is to provide clarity to the existing legislations. Judiciary as the custodian of statutes interprets the legislation. Thus, the students of law on a need based approach will be trained to learn the implications of the schools of textualism and purposivism in the context of statutory construction as a tool of social change.

COURSE OUTCOMES (Cos)

Students completing this course were able to

CO1	To have an elementary understanding and demonstrate an advanced and integrated understanding of the political, social, historical, philosophical, and economic context of law.
CO2	To Engage in identification, articulation and critical evaluation of legal theory and the implications for policy
CO3	To Critically analyze and research complex problems relating to law and legal theory and make reasoned and appropriate choices amongst alternatives.

OBJECTIVES

Professional ethics form the foundation in the lives of the lawyers. Every person has been given the right to engage a lawyer of their choice to represent their case. It means that lawyers have the constitutional obligation to take up the case of every person who approaches them for legal representation. Does it mean that the lawyer is obligated to represent a self-confessed murderer, rapist, and other accused persons who are alleged to have committed very serious offences against the nation even though his conscience or his personal beliefs do not permit that? How can the lawyer do that when his inner conscience revolts at the thought of represent a certain category of persons? All clients approach the lawyer with hope and desire that their lawyers will zealously represent their case. Does zealous representation mean that the lawyers must get the relief sought by the clients by all means? Are there any boundaries set by law or professional ethics that a lawyer must not cross? What is the role of truth and morality in determining the standards of professional ethics for lawyers? What conduct amounts to professional misconduct? What are the repercussions if a lawyer does not follow the principles of professional ethics? What are the mechanisms set by law to deal with complaints of professional misconduct? These and many other similar other questions trouble the mind of new entrants to law practice. The lawyers have to adopt ethical practices in all spheres of their profession from meeting clients, giving them legal counselling, presenting their cases before appropriate bodies, managing client's accounts, etc.

OBJECTIVES

The Objective of the courses is to train the students to understand the laws, regulations and the agreements that are made and implemented by the government and the other various institutions for the protection of the environment are collectively known as the environmental laws. These laws are made to supervise human interaction with nature and to ensure that human activities are not endangering the natural habitats and the lives of the animals and species living there. The environmental laws are although taught in professional courses, the essence of protecting the environment and the awareness needs to be inculcated into students from a young age. The human race has exploited natural resources for so long that their existence has become a question for the future. The exploitation has led to the extinction of many animal species and has also degraded the quality of life that is impacted by the environment. The patterns of the natural phenomenon have changed over time only for us to realize that it is high time to protect the environment and to curb the activities that degrade the resources around us. The purpose of this paper is to familiarize environmental law and its related concept to the students by analyzing all the frontiers of the subject. The paper will provide a clear understanding of emerging concepts like disaster management, coastal regulation and biodiversity laws. With the help of various state legislations which has been cited for pedagogical reference the law student can understand the functioning and role of environmental governance in our country.

OBJECTIVES

The Objective of the courses is to train the students on the era globalization and computerization, with more and more nations computerizing their governance, and e-commerce seeing an enormous growth. Until then, most of international trade and transactions were done through documents being transmitted through post and by telex only. Evidences and records, until then, were predominantly paper evidences and paper records or other forms of hard-copies only. With much of international trade being done through electronic communication and with email gaining momentum, an urgent and imminent need was felt for recognizing electronic records i.e., the data what is stored in a computer or an external storage attached thereto. This transition has put forth need for a law to facilitate and govern activities in the information society and has thus led to the passing of the Information Technology Act, 2000 (IT Act). The prime object of the course will be studying on electronic commerce, electronic signatures, electronic governance, data protection, cyber security, penalties and offences under the IT Act, dispute resolution and other contemporary issues.

COURSE OUTCOMES (Cos)
